

Shopify Backend Developer

Company Overview:

We're thrilled to announce that Oddfish Media, a digital agency, is looking to expand its eCommerce business with key clients. We require a switched-on full-time Shopify Back-End developer who's keen to work with us long-term and help us rapidly expand. This job comes with long-term job security. Our focus is on delivering incredible online shopping experiences to our client's customers, and we're on the hunt for a passionate, talented, and dedicated Back End Developer to join our team. As a crucial member of our development team, you'll have a hands-on role in creating, maintaining, and optimising our Shopify store, ensuring our customers have an amazing and seamless shopping experience that is user-friendly and top-notch.

Job Description:

As a Shopify Backend Developer at Odd Fish Media, you will be at the forefront of creating and maintaining a seamless, high-performance, and secure backend infrastructure for our e-commerce platform. Your work will be vital in providing our customers with an exceptional user experience. You'll collaborate closely with our talented front-end developers, designers, and project managers to deliver the best possible results. So, join our team and let's create something truly remarkable together!

Key Responsibilities:

1. Develop, maintain, and optimise our Shopify store's backend infrastructure which has over 800 products.
2. Integrate and maintain third-party apps, APIs, and services to enhance the store's functionality.
3. Collaborate with the front-end development team to ensure seamless integration between front-end and back-end systems.
4. Write clean, well-documented, and scalable code, adhering to best practices and industry standards.
5. Troubleshoot and resolve any backend-related issues, ensuring maximum uptime and performance.
6. Continuously research and implement new technologies, frameworks, and best practices to improve the store's backend infrastructure.
7. Collaborate with cross-functional teams, including designers, project managers, and other developers, to meet project milestones and deliverables.
8. Provide technical support and guidance to other team members as needed.

Requirements:

1. Bachelor's degree in Computer Science, Software Engineering, or a related field.
2. 5+ years of experience in backend development, with a strong focus on Shopify and e-commerce platforms.
3. Expertise in server-side languages, such as Ruby on Rails, Python, or Node.js.
4. In-depth knowledge of Shopify's Liquid template language, API, and app ecosystem.
5. Proficient in database management, with experience using PostgreSQL or other relational databases.
6. Strong understanding of RESTful APIs and web services.
7. Familiarity with version control systems, such as Git.
8. Excellent problem-solving, debugging, and troubleshooting skills.
9. Strong communication and collaboration skills, with the ability to work well in a team environment.
10. Detail-oriented, with the ability to manage multiple projects simultaneously and meet deadlines.

Nice to Have:

1. Experience with front-end development technologies, such as HTML, CSS, and JavaScript.
2. Familiarity with e-commerce platforms other than Shopify, such as WooCommerce, Magento, or BigCommerce.
3. Knowledge of performance optimisation techniques and tools.

What We Offer:

1. Competitive salary and benefits package.
2. Opportunity to work on exciting and innovative e-commerce projects.
3. A dynamic and supportive work environment that fosters professional growth and development.
4. Flexible work arrangements, including remote work options.

To Apply:

If you are a talented and experienced Shopify Backend Developer looking to make a significant impact in the e-commerce industry, we encourage you to apply. Please submit your resume, cover letter, and portfolio showcasing your previous work and accomplishments. We look forward to reviewing your application and discussing how your skills and expertise can contribute to our team's success.
